Description	The success of a health project is most often determined by how well a project was planned at its inception. Those in charge of managing aspects of a health initiative must tackle key elements concerning the project, such as identifying project stakeholders, determining the core objectives, establishing a timeline for activities and drafting a budget. Participants will engage in practical exercises that will build their capacity to develop international donor applications as well as strengthen their project management abilities.
Target audience	**1.** Junior- to senior- level managers working in public health **2.** Managers who oversee personnel across multiple levels, divisions and locations.
Objectives	**1.** To acquire skills to assess projects and identify elements that contribute to desired outcomes **2.** To acquire skills to use Logical Framework Analysis tools to develop model projects **3.** To acquire skills to create monitoring and evaluation plans to measure project success
